PROFESSIONAL SUMMARY

Junior developer and bilingual professional (Cambridge B2 English) who ships real production software: a background-check SaaS with legal compliance, a REST API with concurrent scrapers, and AI-powered HR automation. My operational experience at RUBASA (HR) and QUIMPAC (IT Support) gave me the business context I apply when building tools companies actually need. Currently pursuing a degree in Information Systems Engineering. I learn fast, work autonomously, and deliver results from day one.

WORK EXPERIENCE

HR Assistant — RUBASA

Aug 2025 – Feb 2026

6-month contract

- Led the full data migration to the new payroll system (IESS & SUT), transferring 100% of records with zero errors, on schedule.
- Managed the complete employee file system: contracts, personal records, and compliance documents, kept audit-ready.
- Supported bi-monthly payroll processing cycles and proactively identified compliance issues.
- Coordinated end-to-end recruitment: applications, interviews via Google Calendar, and candidate follow-up.
- Provided remote technical support via AnyDesk and TeamViewer, resolving access and system issues in real time.
- Built internal HR automation tools still in use by the company (official background verification and AI-powered CV screening).

IT Support Intern — QUIMPAC S.A.

Jan 2025 – Mar 2025

3-month internship

- Independently handled preventive and corrective maintenance for 30+ workstations.
- Deployed OS installations and software updates across the corporate network.
- Resolved Tier-1 support requests independently, solving most on first contact.
- Documented incidents and support tasks using Google Workspace and Microsoft Office Suite.

FEATURED PROJECTS

JR Verifica EC · verifica.dentaklin.shop

Background-check SaaS platform in Ecuador. Queries 4 official government sources in parallel (Education Ministry, Judiciary, SETEC, Attorney General) and returns a risk semaphore. Multi-user, PDFs with verifiable QR, Excel/ZIP export, LOPDP compliance, 101 tests. In production for RUBASA.

Stack: Python 3.12 · FastAPI · SQLite · bcrypt · WeasyPrint · Docker · Sentry

Background Checks Ecuador API · github.com/JostinRendonL/background-checks-ec

REST API with Playwright scrapers querying 4 official government portals in ~10s per request. Redis cache, deep health checks, Prometheus metrics, API-key authentication.

Stack: Python · FastAPI · Playwright · Redis · Docker

RUBASA CV Worker · github.com/JostinRendonL/rubasa-cv-worker

Hands-free CV-screening system with an AI fallback chain (GPT-4o → Gemini → Llama). Receives applications, analyzes the CV, cross-checks background records, and writes the report. Telegram alerts on critical cases.

Stack: Python · OpenAI/Gemini APIs · Google Sheets · Telegram Bot

Marcaciones App · github.com/JostinRendonL/marcaciones-app

Web app that automates biometric time-clock processing: reads the clock Excel, extracts manual records with OCR, assigns shifts, and computes payments. Generates HR-ready attendance reports.

Stack: Python · Streamlit · OCR (Tesseract) · openpyxl

TECH STACK

Languages	Python 3.12 (async, type hints) · JavaScript · HTML5 · CSS3 · SQL · Bash
-----------	--

Frameworks	FastAPI · Jinja2 · Streamlit · Pydantic · openpyxl · WeasyPrint · pytest · httpx
Scraping & Automation	Playwright (Chromium headless) · BeautifulSoup · OCR (Tesseract)
AI & LLMs	OpenAI (GPT-4o) · Google Gemini · Llama 3.1 · Claude · fallback chains
Databases	SQLite (WAL) · Redis · Google Sheets
DevOps	Docker · Docker Compose · Easypanel · Git/GitHub · Sentry · Prometheus
Integrations	Google Workspace · Telegram Bot · WhatsApp Business · Resend · n8n
IT Support & HR	IESS · SUT · Payroll processing · MS Office · Zendesk · Freshdesk · AnyDesk
Languages	Spanish (Native) · English (B2 — Cambridge)

CERTIFICATIONS
